Patric Kraft

July 30th, 2018

Am Arnsee 16
65462 Ginsheim
Germany

To Whom It May concern,

Patric Kraft had been a customer resident engineer in my team since April 4th, 2016.

In the function as a resident engineer he is responsible for total vehicle integration of speakers and amplifiers. He is managing several different projects in parallel from the early development stages through prototype builds and vehicle launch. This includes preparing and running the customer project development meetings (PDT). Furthermore, he is leading the change management efforts at Opel and the required coordination with the Bose team for math data and drawing releases.

Patric is collaborating with the system integration engineer in the area of amplifier hardware and software change management, and is assisting with the release of data files in the customer's databank if needed. In addition he supports indirect team members for audio tunings which are completed on-site at the Opel Technical Center.

Patric has good work ethics and follows through on assignments and action items. In his collaboration with the Bose development team in the United States of America he has demonstrated flexibility in his work hours when needed. His written and verbal communication is excellent in German and good in English. Patric's attention to detail is reflected in the documentation, opens issues management, and tracking lists he maintains.

Patric will be an asset to any future employer, and I wish him all the best on his future endeavors.

With best regards,

A handwritten signature in black ink that reads "Knut Schneider".

Knut Schneider
Bose Corporation
Manager Resident Engineers

29.11.2019

Continental Engineering Services
Breitlacherstr. 94, 60489 Frankfurt am Main

To Whom it May concern,

It is with great pleasure that I write this letter of recommendation on behalf of Patric Kraft. He has been working as a project engineer under my supervision at Continental Engineering Services since January 1st, 2019.

As a Test and Validation Lead Engineer, he is responsible for the component and system validation testing from definition to production release including leading and coordinating the test teams.

Within Patric's responsibility lies the creation of the project test strategy, the consolidation, monitoring, and driving the other disciplines to ensure on time execution of test related activities. He aligns all domain test schedules and maintains them consolidated within the project test schedule. Furthermore, he organizes the definition of regression strategies with the domain test managers and ensures necessary test coverage.

Patric has excellent work ethics to follow through on assignments and action items. He has an inherent ability to relate with his colleagues and achieves success through combined efforts. He respects every individual irrespective of caste, gender, nationality, disability or age. His attention to detail, crisp communication, organization strength, documentation skills, perseverance, and solution-oriented action is a benefit for our team.

Patric will be an asset to any future employer and I wish him all the best on his future endeavors.

A handwritten signature in black ink, appearing to read 'MH', with a long horizontal flourish extending to the right.
