EXPERIENCES

SMARTRANSFER GMBH — *SEPT. 2018- CURRENT, KASSEL, GERMANY*

• Building an ERP software handling mounds of data and convert it to a readable way for users in order to match their profiles to suggested courses or tenders already crawled from trusted jobsearch german and udemyCourses websites. We are using several modern technologies and frameworks such as Elasticsearch, NoSQL, Git, Containers... and ofcourse Spring + Angular.
• With the help from my scrum master, I take responsabily, and more often with time, to handle some devOps configurations and integrate new tools... Let us say I want to merge my programming skills with my system administration knowledge to be a devOps engineer in the near future.

CROSOFTEN TECHNOLOGIA — *MARCH - JULY 2018, UBERLANDIA, BRAZIL*

• Within an agile team, working on creating multi-platform e-commerce website for one of the company's important cutomers. As a responsible on the backend part, I used Spring framework, Hibernate, JPA, mySQL... Besodes, I gave hand in making some frontend features and fixing some bugs using Angular framework
==> project done and client satisfied!

SMARTECH MAXIMO (IBM CORP.) — *JULY - AUGUST 2017, TUNIS, TUNISA*

• Working on small tasks for the entreprise's website using basic php, and basic javascript and html.
• Participating in refactoring and improvement of the mobile application of Maximo platform on iOS using swift.
